

ARYA PRADITHA

Computer Systems Student | IoT | Embedded Systems | Creative / Videography

Bali, Indonesia • +62 859 3115 2688 • aryaditha13@gmail.com

Portfolio: bimbimbo2003.github.io/portfolio-aryapraditha/

PROFESSIONAL PROFILE

Computer Systems student at ITB STIKOM Bali with a strong interest in Internet of Things (IoT), embedded systems, microcontrollers, programming, machine learning, and technology-based solutions. Experienced in academic projects involving ESP32, Arduino, sensors, Python, Flutter, and TensorFlow/Keras. Also experienced in videography and video editing for events, documentation, and visual content. Highly interested in learning new technologies and combining technical skills with creativity.

EDUCATION

ITB STIKOM Bali — Computer Systems

Current student

TECHNICAL SKILLS

- **IoT & Embedded Systems:** ESP32, Arduino, sensors, basic automation, IoT system concepts
- **Programming:** Python, basic application development, data processing
- **Machine Learning:** TensorFlow/Keras, CNN, image classification, dataset preparation
- **Mobile Development:** Flutter, UI implementation, SQLite/sqlite concepts
- **Tools:** Google Colab, Visual Studio Code, Canva

CREATIVE SKILLS

- **Videography:** event and project documentation, visual storytelling
- **Video Editing:** CapCut, basic post-production
- **Photo Editing:** Lightroom

SELECTED PROJECTS

Smart Farming / Automatic Spraying IoT

Developed an IoT project with a lecturer focusing on an automatic spraying system using a microcontroller and sensors to support agricultural automation.

Smart Trash Bin — Organic Waste Processing

Designed a Smart Trash Bin concept for processing organic waste into liquid organic fertilizer using IoT, with ESP32 and sensors for control and monitoring.

Embedded Machine Learning / Image Classification

Explored image classification using Python and TensorFlow/Keras, including dataset preparation, preprocessing, CNN training, and model evaluation.

Flutter Contact Application

Developed a contact-list application using Flutter with input forms, data lists, and exploration of SQLite/sqlite for data storage.

CREATIVE EXPERIENCE

Videography & Event Documentation — Side Projects

Worked on several videography and video-editing projects outside university activities, mainly for events, documentation, and visual content. The portfolio also features documentation of an IoT equipment installation project in Bedugul, Bali.

ACADEMIC & PROJECT EXPERIENCE

- Participated in lecturer-led IoT projects, including an automatic spraying system.
- Developed and documented projects involving ESP32, Arduino, sensors, and automation.
- Worked on machine learning and computer vision projects as part of university coursework.
- Prepared a research proposal on a Smart Trash Bin and IoT-based organic waste processing.

CORE STRENGTHS

Problem Solving

Analyzing problems and identifying appropriate technical solutions.

Learning Agility	Able to learn and adapt to new tools and technologies through projects.
Teamwork	Experienced in collaborative academic project work.
Creative Thinking	Combining technology, visual communication, and creativity in projects.
